

What We Do

Psychiatric Assessment and Evaluation

A thorough psychiatric assessment will be performed at each initial appointment with your provider. A treatment plan will be developed collaboratively between the provider and the client. Medication(s), psychotherapy, and other potentially helpful treatments will be discussed at this time.

Medication Management

Our dedicated Physician Assistants and Nurse Practitioners are trained to professionally assess, diagnose, plan, implement, and evaluate the outcomes of psychotropic medications regarding our client's mental wellness.

Psychotherapy

Also known as "talk therapy." Our compassionate certified therapists provide a safe environment for constructive dialogue. This helps clients develop the tools needed for stress and symptom management.

Pharmacogenomic Testing

By definition, Pharmacogenomic Testing is used to find out a person's response to a specific medication. To perform this test, a saliva sample is collected and analyzed.

Pediatric Services

The goal of pediatric psychology (which may include medication, psychotherapy, or a combination of both) is to promote the mental well-being and development of children, pre-teens, adolescents, and their families.

Medical Weight Loss

Our Medical Weight Loss services continue to promote physical well-being and an all-around healthy lifestyle. Comprehensive consultation with individualized treatment plans, and an evaluation of underlying metabolic influences which may contribute to struggles with weight loss.

Contact

WSW offers direct and self-service access. Be it new patient requests, provider referrals, or our patient portal for direct communication, we strive to make your experience as easy as possible.

Ohio Area**

Who We Are

Our highly experienced WSW Team includes board certified specialists committed to treating, inspiring, empowering, nurturing, and supporting the human spirit. Our office is proud to offer both prescribers for medication management and therapists for psychotherapy. At WSW, we are devoted to not only upholding, but surpassing standards of mental health care and our clients' expectations. We serve the Southwest Ohio Area with honor.

Do not be ashamed of what you have been through. Be proud of yourself for being here today, and what you will overcome.

WSW achieves a superior standard by offering a comprehensive selection of mental health services with the goal of cultivating the optimal form of ourselves.
